

## FAQ'S

### Can ROXX be scratched?

It is difficult, but can be done with effort. ROXX is made from quartz and granite which are two of the hardest most resilient and durable natural materials on earth, creating a natural surface that is extremely hard wearing and scratch resistant. This does not mean that it is indestructible. Sufficient force or pressure and harsh chemicals can damage the benchtop.

### Does ROXX stain?

ROXX is highly resistant to staining. It is unaffected by most household chemicals. However like all natural stones care should be taken with strong bleaches, paint strippers and oven cleaners.

### Is ROXX heat resistant?

Yes. However like all surfaces we recommend that a heat pad or trivet is always used as extreme heat changes can damage your ROXX surface.

### How do I care for ROXX?

ROXX is a low maintenance surface which requires the same care as other stone surfaces. Refer to the Care & Maintenance Guide at [www.ROXXstone.com](http://www.ROXXstone.com) for more details.

### Will my ROXX product match my sample?

As ROXX is a natural product panels can vary slightly from the samples in texture and colour.

### Where do I purchase ROXX?

Visit [www.ROXXstone.com](http://www.ROXXstone.com) to find an approved dealer.

### What warranty does ROXX come with?

The ROXX panel comes with a 10 year limited warranty.

## ROXX STONE - THE FUTURE OF STONE

*ROXX combines the classic heritage of natural stone with leading technology to create a slim, lightweight, durable stone with unlimited applications.*

### THE ROXX ADVANTAGE

By using the latest composite technologies we have created a slimmer, lighter, more flexible stone - with a lower environmental impact.

ROXX out performs; it's strong, hard wearing, scratch resistant, and highly stain resistant. Plus, unique to ROXX, its light weight and slim profile create many more opportunities for stone surfacing in your home.

Available in an extensive range of colours, you can take advantage of ROXX's unique properties to create an integrated flow of natural surfaces throughout your living and working spaces.

Applications for ROXX include wall linings, flooring, wet area linings, custom made furniture and bench tops.

### WHY CHOOSE ROXX

	Laminate	Marble	Granite	ROXX	20mm Engineered Stone	Solid Acrylic Surfaces
Heat Resistant		✓	✓	✓	✓	
Highly Stain Resistant	✓			✓		✓
Scratch Resistant		✓	✓	✓	✓	
Flexible (curve)				✓		✓
Light Weight	✓			✓		
Environmentally Sound				✓		

### ENVIRONMENTAL COMMITMENT

ROXX does not compromise the world we live in to create its quality products. We asked; "Why needlessly consume the world's precious resources?"

ROXX's light weight means fewer resources are required to create beautiful stone surfaces. At only 6mm thick, ROXX has cleverly used technology to minimise the use of the earth's limited natural resources, (60% less resources than a 20mm stone).

ROXX also uses granite trailing's (rubble waste) in the formulation of its product, and other recycled materials or high grade waste materials are used wherever possible. Plus, all water used during manufacturing is recycled. Stone waste from manufacturing can be used in fertilizer.

## FLOOR TO CEILING STONE

*ROXX is available in large 3.03m x 1.44m sheets making continuous floor to ceiling stone easy and affordable. Alternatively ROXX can be cut to the tile size that suits your design.*

### Easy clean & grout free

Non-porous stone makes for easy maintenance and cleaning. Grout is porous and attracts mould and grime. ROXX panels are joined with silicon not grout, making for a cleaner, healthier surface.

### Hard wearing - scratch & stain resistant

ROXX is made from granite and quartz, two of the hardest stones known to man making it durable and resilient.

### Colours to please

The extensive ROXX range of contemporary colours means you can achieve your signature style.

Plus we've partnered with the interior design team at Resene paints to provide suggestions on complimentary paint colours. Go to [www.ROXXstone.com](http://www.ROXXstone.com) and select a ROXX colour to view the Resene colour suggestions.

### Starting from scratch or upgrading

6mm ROXX stone panels are slim and lightweight. They can quickly and easily be applied to any substrate making them equally suited for a new bathroom or a renovation.

### Lightweight and easy to install

ROXX is so light installation is a breeze, making it easy to use in tight spaces such as shower linings. Large lightweight sheets means ROXX can be quickly laid over existing substrates or linings (like tiles); minimising any mess or disruption, saving time and money.

### 10 year warranty

ROXX is covered by manufacturer's limited 10 year warranty.

**ROXX Pumice:** By mixing granite and white quartz we create a bold, textured stone, perfect for contemporary bathroom designs.

## WALLS, FLOORS AND BENCHTOPS

*Due to its slim profile, lightweight, and hard wearing stylish properties ROXX works equally well on the floor as it does on walls. And of course being non-porous, stain and scratch resistant it's perfect for benchtops and vanities.*

### HARD WEARING

Made from granite and quartz, durable, strong and scratch resistant ROXX is perfect for busy hard working areas such as; entrances, bathrooms, kitchens and living rooms.

### FLOORS

#### Tile sizes to suit

Created in large 3.03m x 1.44m sheets ROXX can be cut to size giving you the flexibility to decide how big you'd like your tiles to be.

#### Raised and access floors

Lightweight ROXX is ideal for tiling raised floors over under-floor ducting systems.

### BENCHTOPS AND VANITIES

#### Design advantage

ROXX durability, flexibility and unique features makes creating stunning benchtops and vanities not only achievable, but also affordable.

ROXX suits stunning super-thick counters (60mm+) and works equally well for slimline benchtops. Try adding matching or complimentary splash-backs in kitchen, bathroom or laundry areas to integrate your design throughout your home.

#### Flexible curves - stone that bends

ROXX combines natural stone with technology to create a truly flexible stone that can be shaped and applied to curves. How about a 200mm thick curved vanity top? With ROXX you can.

### VERSATILE APPLICATIONS

ROXX can be cut to size from large format panels and used anywhere in the home; work tops, walls, floors and custom made furniture. Seamlessly integrate modern spaces by applying ROXX to multiple elements.

Bathroom	Kitchen	Living Areas	Furniture
Walls	Kitchen bench	Flooring / Suspended floors	Dining table
Flooring	Splash back	Walls / feature wall	Coffee table
Shower Lining	Flooring	Fire hearth, mantel & surround*	Media centre
Shower base	Kick board	Hallway / entrance area flooring	Shelving unit
Vanity top	Walls / feature wall		Office cabinets / shelving units
	Cabinet front		Desk tops

\* Not suitable for open wood fires where embers could fall onto ROXX surface.
